Data Science undergraduate at BINUS University with a CGPA of 3.23/4.00 and hands-on project experience. Familiar with data analysis, machine learning model development, computer vision, and ETL pipeline deployment. Passionate about using data to find practical approaches to solving real-world and business problems.

EDUCATION

Bina Nusantara University (BINUS) – West Jakarta, DKI Jakarta

Bachelor of Computer Science, Data Science Program — Expected Graduation: May 2028

- **CGPA:** 3.23/4.00
- **Relevant Courses:** Algorithm Design & Analysis, Artificial Intelligence, Bayesian Data Analysis, Big Data Infrastructure & Technology, Data Management & Organization, Data Mining & Visualization, Data Security, Data Structures, Deep Learning, Machine Learning, Model Deployment

Sekolah Bunda Mulia – Central Jakarta, DKI Jakarta

High School — July 2021 - June 2024

EXPERIENCE

CIMB Niaga – Melawai, Jakarta

Sales Personal Loan — [April 2024 - August 2024]

- Offered personal loan products to prospective customers and explained product terms and requirements
- Built customer relationships through clear communication and follow-up to support sales targets

PROJECTS

Credit Score Classification ETL Pipeline & AWS Deployment

Python, AWS, FastAPI, Streamlit

- Built an end-to-end ETL pipeline for credit score classification, including data cleaning, preprocessing, and transformation
- Deployed the inference ML pipeline on AWS SageMaker, integrated with FastAPI and Streamlit for user interactivity

Automated Odd–Even Traffic Monitoring Using Computer Vision

Python, TensorFlow, HTML, CSS, JavaScript

- Developed a YOLOv8 CNN-based computer vision pipeline that automatically detects license plates, reads them, and identifies odd-even traffic violations, achieving 95% detection accuracy and 0.975 mAP@0.5
- Built a web-based interface supporting image uploads and live camera input for real-time traffic monitoring

BabyBoost: Parenting Website with Machine Learning-Based Stunting Prediction

Python, Figma, HTML, CSS, JavaScript

- Developed an interactive parenting website for child growth monitoring, nutrition information, and parenting guidance
- Deployed a Random Forest stunting prediction model with 96% accuracy, integrated into the website using Pickle

CERTIFICATIONS

- **AWS Academy** – Cloud Architecting (2026), Cloud Foundations (2026), Machine Learning (2026)
- **Nvidia** – Fundamentals of Deep Learning (2026)
- **Beelingua** – Market Research & Business Communication (English CEFR C2.2) (2025)

ORGANIZATIONS

Data Science Club at BINUS University – West Jakarta, DKI Jakarta

Member — 2024 - Present

- Participated in data science workshops, learning materials, and community activities with fellow members

GKJ Jemaat Jembatan Lima – Jakarta

Head of Komisi T4C Organization — 2023 - 2024

- Led the commission's members and coordinated its activities and programs

Member of Komisi T4C Organization — 2021 - 2023

- Supported the commission's activities and programs as a committee member

SKILLS

Data Analytics: Python, SQL, Excel, PowerBI, BigQuery, R

Data Science: Scikit-learn, TensorFlow, PyTorch, Keras, Spark

Development: Git/GitHub, Docker, C, HTML/CSS/JavaScript, Figma

Languages: English (fluent), Indonesian (native), Japanese (basic)
